

### **DIRECTIONS**

Cut out square.

Cut the four solid cut lines, being careful to end cut where line ends.

Bend (do not fold) corners 1,2,3 and 4 into the middle X.

Push a straight pin through the four numbered corners, and the X.

Now push the pin into one end of a pencil's eraser.

Blow on the pinwheel, wave it through the air, or hold it up to a breeze.

Try coloring or striping the back of each blade before bending them around.
